A proposed alternate method is subject to provisions in §3221 of the 2012 Oil and Gas Act, 58 Pa. C.S. §3221 Section 13 of the Coal and Gas Resource Coordination Act, 58 P.S. §513 and 25 PA Code §§78.75-78.75a (relating to Alternate Methods.) **Attach proof of notification of coal operator(s).**

Describe in reasonable detail using a written description and / or diagram:

- 1. the proposed alternate method or materials, and**
- 2. the manner in which the alternative will satisfy the goals of the laws and regulations.**

EQT's Proposed Alternate Method of Plugging for wells located in coal areas.

1. In lieu of venting requirements of 78.92 or 78.93 relating to wells located in coal areas, EQT proposes to cement the well from total depth or attainable bottom to surface. This will meet the requirements of 78.91H regarding cementing solid from the total depth or approved attainable bottom to surface which is superior to a gel/cement sequence in coal area wells and eliminates the need for the vent.
2. EQT will cement the well from total depth or attainable bottom to surface with Class A cement to stop the vertical flow of gas or fluids to surface within the wellbore.
3. EQT will reclaim and set plugging monument according to PA DEP regulations after the well is plugged.

Optional: Approval by Coal Owner or Operator		Signature of Applicant / Well Operator
