4. **Description of Contamination & Remedy.**

In the summer of 2013, the US Environmental Protection Agency conducted a comprehensive site investigation to determine the extent and degree of waste and/or contaminated soil at the properties that encompass the Kaercher Creek Lake Battery Casings Site (Site). The Land Recycling Program Regulations, Statewide Health

Residential Direct Contact standard for lead in soil is 500 mg/kg and the Soil-to-Groundwater standard for Used Aquifers is 450 mg/kg while the sediment standard for lead in wetlands and waterways is 128mg/kg. The sample results showed levels of lead above the 450 mg/kg standard for soils at various locations on the Property. Lead contamination was also detected in close proximity to a drainage way that discharges into Kaercher Creek Lake. The extent and location of the contamination is described in detail in the Trip Report issued by the U.S. Environmental Protection Agency in December of 2013.

The Kaercher Creek Park Work Plan, dated January 16, 2014, details the remediation and restoration activities undertaken at the Kaercher Creek Lake Property. Due to the nature of the remediation, lead contaminated soil above the applicable standard were left in place on this Property because it was not economically feasible or practical to remove it from the site. All areas within the site that were found to have lead contaminated soil above statewide standards for direct contact and soil-to-groundwater for used aquifers were encapsulated under 1.5 feet of clean fill. The clean fill was graded, and compacted, then covered with 0.5 feet of topsoil. All disturbed areas were planted with grass seed to establish an easily maintainable and erosion resistant grassy cover.

Copies of the Administrative Record for the Kaercher Creek Lake Battery Casings Site response action are maintained at the Windsor Township Municipal Building and the DEP Southcentral Regional Office in Harrisburg, PA.

5. **Activity & Use Limitations.** The Property is subject to the following activity and use limitations, which the then current owner of the Property, and its tenants, agents, employees and other persons under its control, shall abide by:

Soil Use Limitation – If future Property development includes excavation activities, best management practices shall be used to limit worker exposure and decrease the potential spread of lead (e.g., impacted soils should be staged, covered, and secured to prevent surface water runoff). Material excavated and removed from the Property shall be managed, transported, and disposed, recycled, or re-used in compliance with all federal, state, and local laws, regulations, and ordinances pertaining to the environment and occupational safety.

6. **Notice of Limitations in Future Conveyances.** Each instrument hereafter conveying any interest in the Property subject to this Environmental Covenant shall contain a notice of the activity and use limitations set forth in this Environmental Covenant and shall provide the recorded location of this Environmental Covenant.

7. **Compliance Reporting.** The current owner of the Property shall within 30 days submit to the Department written documentation of any / all of the following: noncompliance with the activity and use limitations in this Environmental Covenant; transfer of the Property; changes in use of the Property; or filing of applications for building permits for the Property and any proposals for any site work, if the building or

proposed site work will affect the contamination on the Property subject to this Environmental Covenant.

8. **Access by the Department.** In addition to any rights already possessed by the Department, this Environmental Covenant grants to the Department a right of reasonable access of the Property in connection with implementation or enforcement of this Environmental Covenant.

9. **Recording & Proof & Notification.** The Department shall file this Environmental Covenant with the Recorder of Deeds in Berks County. The Department shall send a file-stamped copy to Windsor Township and the Pennsylvania Fish and Boat Commission.
